Lane Diagram

39 BOARDS · ARROWS · DOTS · PIN DECK

Drawn from the bowler's view for a right-hander: board 1 is on the right. Lefties count boards from the left. Draw your line, mark where you stood and where the ball broke.

Bowler _____ Date _____ Center _____ Pattern _____

Game / frame	Game / frame	Game / frame	Game / frame
Ball	Ball	Ball	Ball
Stand	Stand	Stand	Stand
Target	Target	Target	Target
Breakpoint	Breakpoint	Breakpoint	Breakpoint
Result	Result	Result	Result

Reading it: the guide dots sit about 7 feet past the foul line and the arrows about 15 feet, on boards 5, 10, 15, 20, 25, 30 and 35. The head pin sits on board 20, 60 feet from the foul line.

Using it: write your stance board and target, then draw the ball path you saw. Mark where it broke and what it left. Over a few games the pattern of moves shows you how the lane is changing.
